

'DUAL SENSE' VOLTAGE SENSITIVE RELAY

The Dual Sense VSR supersedes the single sensed unit by allowing the voltage of both battery banks to be monitored. If either battery bank is receiving a charge the VSR will parallel the two battery banks. The Dual Sense unit is designed for situations where a 230 volt battery charger or second charging source is used into the house battery bank.

H 69mm W 69 D 50mm

CP12DF Dual Sense Voltage Relay 140amps
CP24 Charging systems up to 140 amps/24V

24 VOLT TO 12 VOLT CHARGE EQUALIZER

Simple 3 wire design . Battery level LED display. Capable of 12V 30 amps continuous output. Output voltage adjustable between 13.2V and 14.8V. Starts up when vehicle charge rate is 26.5V or higher. Back-feed diode protection, prevents 12V leakage back into the 24V system via the unit. Integrated 30A fusible link. Require for installation a 50 AMP relay

SA113 30 Amp
SA113R-R 50 Amp Relay (required for installation)

24v to 12v VOLTAGE REDUCER

SA112 10 Amp
RV-DC20 20 Amp

DEEP CYCLE BATTERY

ENDURANT CYCLEMASTER Is a high integrity deep cycle battery. With plate grids ranging from 2.2mm to 5mm in thickness plus glass-mat separators and hot-melt cell group bonding, this robust construction provides a good cycle life and resistance to corrosion when subjected to top of charge and float duty charging voltages. The Endurant cyclemaster range has proven to be extremely reliable in a variety of conditions.
